I suggest switching to the English language. The translation loses the essence of the test

I suggest adding this tests:

CT: Compression Tests

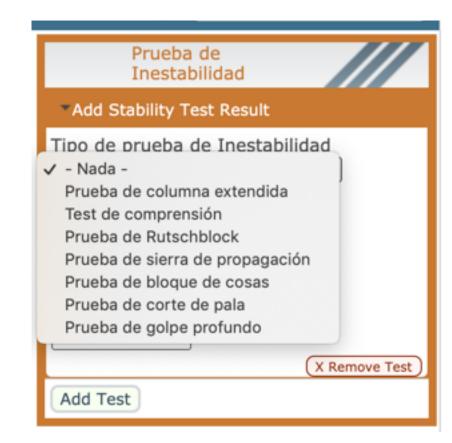

DT: Deep Tap Tests

ECT: Extended Column Tests PST: Propagation Saw Tests

SC (N / W / C / S / L): Ski Cut Tests

STT (E / M / H): Shovel Tilt Test

Hand (E / M / H): Hand Comp/Shear Test

Can you add this Test: CPST (PV/x/y/END/SF/Arr)? Attached ISSW paper written by Sntiago Rodriguez. We in Ushuaia use this testing a lot.
